Bulletin Board Guide

We hope you'll enjoy creating this fun IXL bulletin board in your classroom! Here are some handy tricks to customize this kit for your students.

Tips and tricks

Go green

- For the elements that need updating, save paper by laminating or using sheet protectors! Then, you can use dry-erase markers to record and update your students' progress.

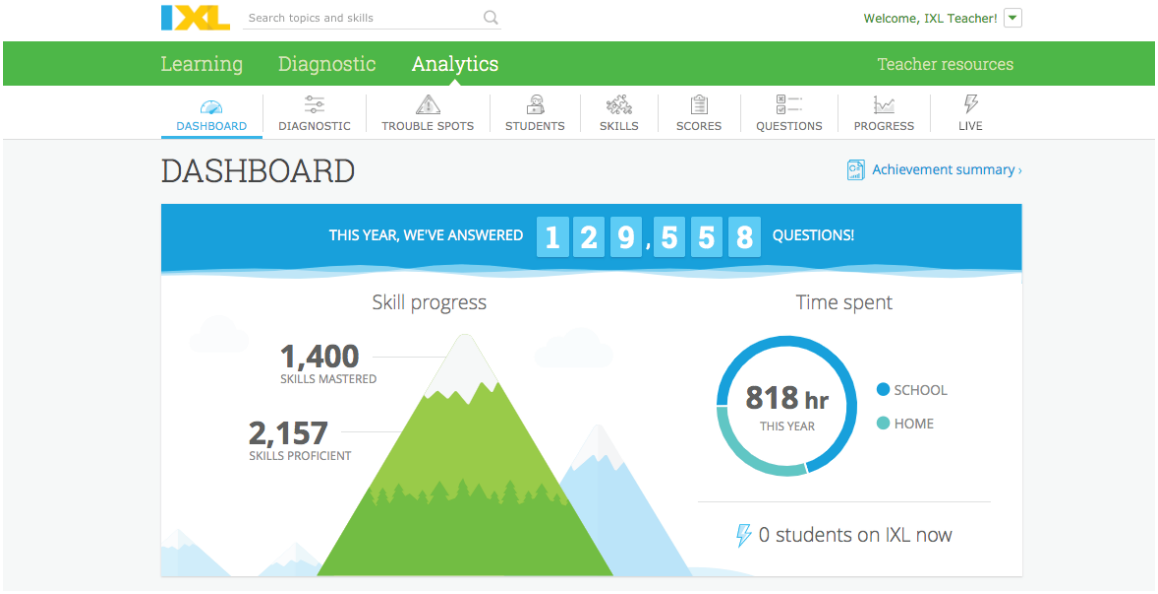
Personalize it

- You know what motivates your students best. Print out and showcase the sections that will speak to them!
- Use the editable student leaderboard page to create your own measures of success! Some ideas are: Most Improved, Awesome Progress, and Diagnostic Master.

Dive into Data

Celebrating class milestones

- Your IXL Analytics Dashboard has all of the information you need to showcase your class's progress this year!



Dive into Data

Updating student leaderboards

- We recommend using the Students Quickview report! Adjust the fields at the top based on the time frame you'd like to use. Then, scroll down to Students, and choose Sort by Time and Questions.
- To see which student has mastered the most skills so far this school year, check out the Mastered column in the Progress and Growth report.

Skill of the Day

- When you've found a skill you want the whole class to work on, you can highlight it here! Be sure to include the 3-digit Skill ID — students can type this into the search bar to find the skill instantly.
- Tip: Afterwards, use the Skill Analysis report to dive into your class' progress!

More printable fun

- **IXL Rockstars** are students who have reached 10,000 questions, or classes who have reached 100,000 questions! You can create a space to measure progress and/or celebrate students who have reached this milestone — and feel free to use our other fun Rockstar printables!

- Create your own **Certificates Center** of special certificates you want to display. If there's not enough room on the bulletin board, you can try filling up an unused space in your classroom!

- Use the **IXL Tips and Tricks** area to share helpful information with your students, like our SmartScore and Recommendations printables.
