

Built-in support for every EL student

IXL is available in 100+ languages! This unprecedented language support enables **all** students to make progress in essential skills, even if they are still building their English language abilities.

Teachers can make on-demand language support available to **each student in their native language**, to instantly provide tailored support for all of the English learners in their classroom.

With a simple click, students can see IXL math, science, and social studies skills in their native language.

The screenshot shows the IXL interface with a math problem in Spanish and English. The Spanish text reads: "Nick abrió una cuenta de ahorros y depositó \$300.00 como capital. La cuenta genera un 3% de interés compuesto anualmente. ¿Cuál es el saldo después de 5 años?". The English text reads: "Nick opened a savings account and deposited \$300.00 as principal. The account earns 3% interest, compounded annually. What is the balance after 5 years?". Below the English text is the formula $A = P\left(1 + \frac{r}{n}\right)^{nt}$ and a instruction to round the answer to the nearest cent. The interface also shows a "Spanish" language selection button and a "Recommendations" icon.

Plus, audio support is available in 70+ languages, so learners can hear questions and answers read aloud.

Industry-leading language coverage
