SmartScore Goal Poster

IXL's SmartScore is a special scoring system that gives you the best possible information on a student's true understanding of a skill. Use the SmartScore to set goals for your students and keep them motivated.

SETTING SMARTSCORE GOALS

- The IXL SmartScore ranges from 0-100 but is not a percentage score. It takes into account several factors, including questions answered correctly and incorrectly, question difficulty, recent answers, and consistency.
- As the SmartScore goes up and down, questions become harder or easier, which ensures students are engaged at the perfect level!

Best practice:

- When introducing a concept, set a SmartScore goal of 80 (proficiency) or 90 (excellence) for your students. If you have students who are ready for an extra challenge, have them strive for mastery (100)!

Pro Tip:

- Set SmartScore goals for your suggested skills! On your Profile & settings page, you can set SmartScore goals for your whole class, specific groups, or even individual students to further differentiate practice.

SMARTSCORE GOAL POSTER

Display this SmartScore poster in your classroom to help you:

- Visually explain IXL's SmartScore to students and parents, showing them that their score may fluctuate, but they can always reach their goal.
- Communicate SmartScore goals to students—for example, by drawing a star next to the score you want them to aim for!
