

The IXL Assessment Suite

Our assessment suite works in concert with the IXL curriculum to give you real-time insight into performance, pinpoint gaps in knowledge, and provide specific next steps to help each student grow.

SCREEN FOR INTERVENTION

IXL's Universal Screener: Accurately identify students in need of extra support in as little as 20 minutes. Designed with the most modern assessment principles, the screeners' advanced algorithm adjusts after each question to quickly pinpoint proficiency levels in K-8 math and reading.

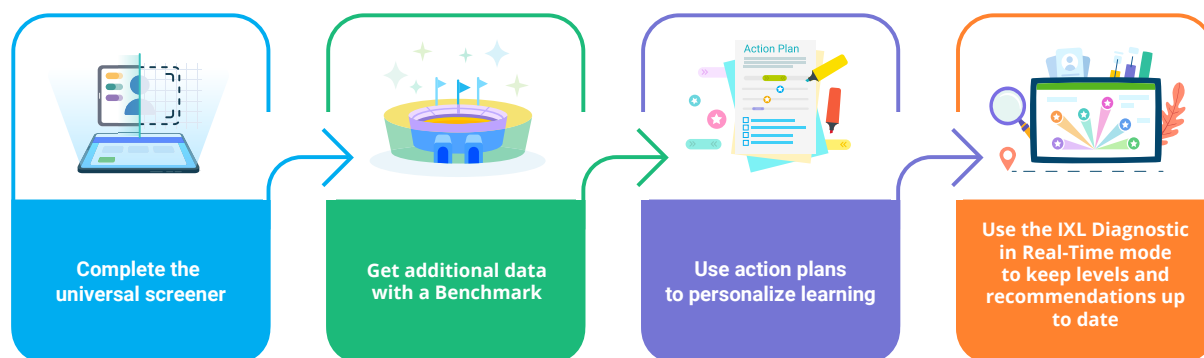

TRACK GROWTH OVER TIME

IXL Diagnostic in Benchmark mode: Create assessment windows to benchmark students' growth in PreK-12 math and ELA. After completing a Benchmark, students can work through their personalized action plans, closing their exact knowledge gaps.

PERSONALIZE LEARNING

IXL Diagnostic in Real-Time mode: Differentiate your lessons with an ongoing, real-time diagnostic. With just 10-15 minutes per week spent in the diagnostic, students' levels and personalized skill recommendations stay up to date. Teachers can use these insights to target their lessons every day.

From assessment to instruction

1. Start with IXL's universal screeners to efficiently and accurately identify students in need of intervention.
2. Then move into a Benchmark to capture students' initial levels and generate personalized action plans to guide independent work and teacher instruction.
3. Instruct students to return to the Diagnostic arena once a week for 10-15 minutes to keep their levels up to date.
