

IXL is designed to help *all* students engage with grade-level content while maintaining academic rigor. Our accommodations are grounded in learning science and best practices for accessibility, ensuring that students can demonstrate what they know without unnecessary barriers.

Below is an overview of the accommodations available across the platform, including when to use them, who can manage them, and how they support equitable access without changing academic standards. Some settings are administrator-only to ensure consistency and compliance. Teachers should partner with administrators if an accommodation requires school- or district-level approval or clarification.

Availability and settings

LevelUp Diagnostic Accommodations			
Accommodation	Availability	Admin can set/adjust	Teacher can set/adjust
Audio support	<ul style="list-style-type: none">Automatic for PK-2Extended audio options available	✗	✓

Usage Guidance

Accommodation	Usage guidance
Audio support	<ul style="list-style-type: none"> Helps students with decoding or language-processing challenges understand tasks and focus on the meaning of the content. Does not change the academic standard and is most appropriate when reading is not the skill being assessed.
Extended time	<ul style="list-style-type: none"> Provides additional processing time so students can accurately demonstrate knowledge without changing learning expectations or academic rigor. Supports organization, strategy use, and reduced test anxiety when used consistently.
Scratchpad	<ul style="list-style-type: none"> Supports students with executive functioning or text-tracking challenges by allowing annotation, highlighting, and note-taking during tasks. Helps students identify key information, create visual cues, and stay engaged in problem-solving with limited tools that reduce overstimulation.
Spanish support	<ul style="list-style-type: none"> Promotes access and equity by allowing students to demonstrate math understanding without English language barriers affecting performance. Helps students focus on math reasoning and problem-solving by reducing errors tied to language, vocabulary, and multi-step directions.
