

# IXL Parent Guide

## Personalized SAT study plans

Your student's personalized SAT study plan is a tailored list of skills to help them close knowledge gaps and maximize their progress toward their target score.

### FROM A STUDENT'S VIEW

If IXL has already uploaded your student's SAT scores, you can find their personalized study plan on the [Student Dashboard](#) or on the [Skill plans page](#).

The screenshot displays the IXL Student Dashboard interface. At the top, a green header bar contains a flower icon and the text "Hi Mel, Good morning!". Below this, a section titled "What should I work on?" features three tabs: "From your parent", "Recent skills", and "Recommendations". The "Recommendations" tab is active, showing a list of skill cards. Each card includes a skill title, a brief description, a difficulty level (e.g., 8CV, 9SS, MD5, HQD), and a "Try this" button. The skills listed are: "Use context to identify the meaning of a word", "Division rule for exponents", "Find the slope from two points", and "Multiplication rule for exponents". To the right of the skill cards, there is a section titled "Keep your Real-Time Diagnostic up to date!" with a button "Step into the Arena". Below this, a "Study Plans" section shows a circular icon with "THE SAT" and "MY STUDY PLAN" text, and a button "Personal SAT® study plan".

Get your personal SAT<sup>®</sup> plan with IXL StudyWise

Chart a clear path to success with a personal plan based on your own scores

Enter your scores from a previous SAT or PSAT test (or practice test), and IXL StudyWise will create an easy-to-use study plan just for you!

Standard English Conventions

Create study plan

If not, students can visit the [SAT StudyWise](#) creation form and enter their scores from a previous or practice test. You can also create study plans from your parent account.

## FROM A PARENT'S VIEW

Encourage your child to work on two skills every week from their personalized study plan. [Research](#) shows that reaching proficiency (a SmartScore of 80) in at least two skills per week can boost test scores.

You can monitor your learner's progress by clicking "View report" to easily check how many skills they've reached proficiency on.
