

# Implementation guide: IXL for personalized instruction

These are IXL skill alignments pertaining to the i-Ready® Diagnostic and are provided by IXL as a service to teachers, students, and parents. IXL is not affiliated with, sponsored, or endorsed by Curriculum Associates, and Curriculum Associates was not involved in creating these skill alignments.

## Steps to successful implementation

IXL's personalized study plans guide students to the exact skills that will help them grow the most based on their i-Ready Diagnostic scores. And good news, IXL has already uploaded your students' scores! Here's how it works:

### Access study plans.

Direct students to navigate to their personalized study plan.

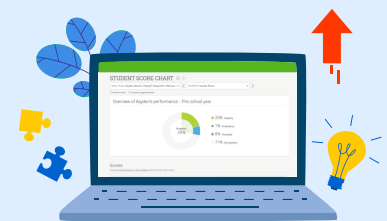

2

### Set goals for students.

Aim for proficiency (a SmartScore of 80) on two skills per week.

3

### Monitor student progress.

Use insights from IXL Analytics to plan next steps.

1

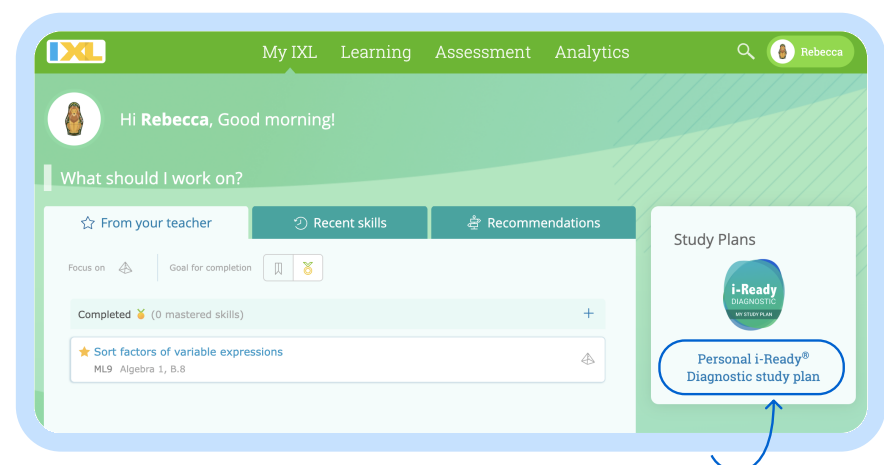

## Access study plans

### STUDENT VIEW

Each student has their own personalized study plan pinned to their dashboard filled with skills that they are ready to learn next based on their most recent i-Ready scores.

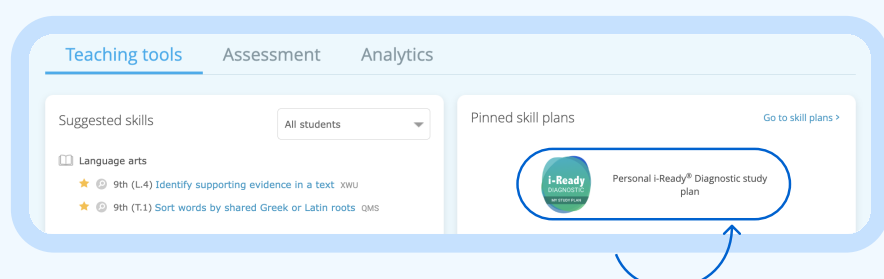

#### Pro tip:

Once they open the study plan, direct students to select the subject they should be working on.

### TEACHER VIEW

From your teacher dashboard, you can access all of your students' personalized study plans.

## 2

### Set goals for students

Encourage students to strive for proficiency (a SmartScore of 80) on **two skills per week**. Remember that each skill is adaptive, and will guide students from simpler to more complex problems.

As students are working on IXL skills independently, they will have additional support and guidance with [IXL's built-in instructional resources](#).

## 3

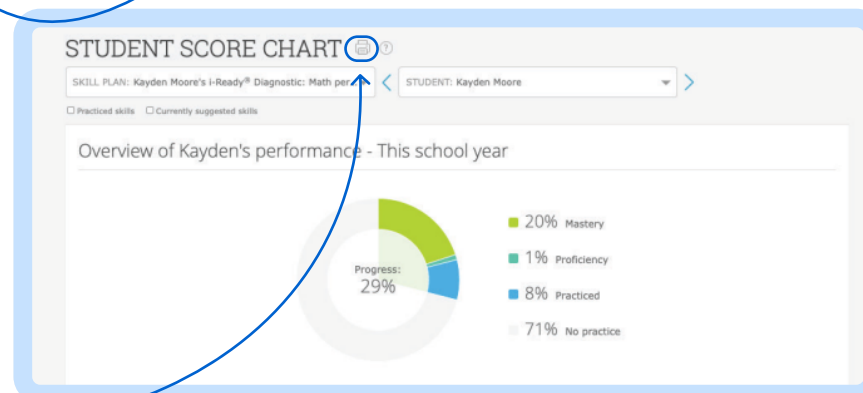

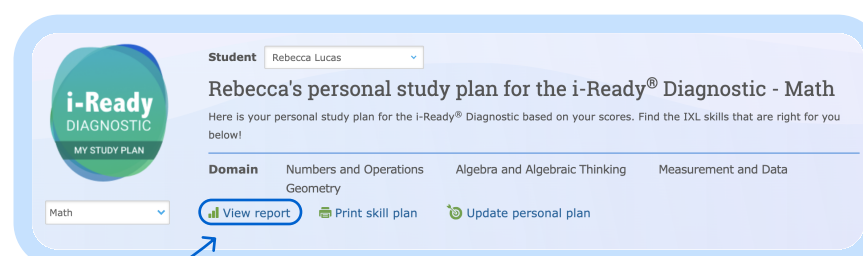

### Monitor student progress

Visit the Student Score Chart report to check for assignment completion and see students' SmartScores for the skills they have been working on.

To view this report, select "View report" at the top of a student's study plan.

Students who have reached a SmartScore of 80 are proficient in the skill, while students below an 80 may need additional assistance.

This report is great for individual student conferencing and can be printed for important meetings and parent-teacher conferences.

#### Pro tip:

Students can also monitor their own progress directly from their personalized study plan. If a student completes all skills in one domain, they can click "I'm ready for more" to see the next skills that build on the knowledge they've gained.
