IXL for Accelerating Instruction in Texas

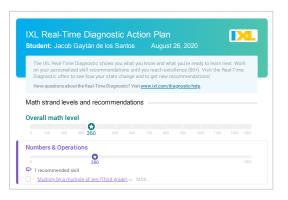

IXL's K-12 personalized learning platform is used by 14 million students. Our comprehensive, standards-aligned curriculum adapts to each student and provides guidance that targets their specific needs. This makes IXL the perfect complement to accelerate instruction for students who did not pass the State of Texas Assessments of Academic Readiness (STAAR®), as required by Texas House Bill (HB) 4545 and 1416.

REQUIREMENTS

HOW IXL SUPPORTS ACCELERATING INSTRUCTION

Establish individual educational plans for the student and monitor progress.

The IXL Real-Time Diagnostic helps you understand exactly what students know, and precisely what to do to help them improve. Lightweight and flexible, the Real-Time Diagnostic can be used for benchmarking and throughout the year as an instructional diagnostic. Based on each student's results, IXL's Diagnostic provides targeted recommendations that will help them grow. These personalized action plans link to specific IXL skills, giving teachers a simple way to differentiate instruction, fill knowledge gaps, and facilitate meaningful progress.

Utilize effective instructional materials designed for supplemental instruction that can be delivered during the school day, as well as before or after school.

IXL is an online platform that makes personalized learning simple and effective. The curriculum is built on 9,000+ skills that unpack every concept into scaffolded building blocks to support your standards-based instruction. With multiple skills for each topic, teachers can target specific areas of need to help students master essential TEKS standards.

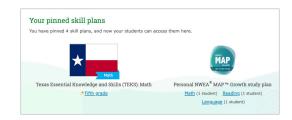

Deliver targeted
Texas Essential
Knowledge and
Skills (TEKS)-aligned
instruction for the
applicable grade
level and subject
areas.

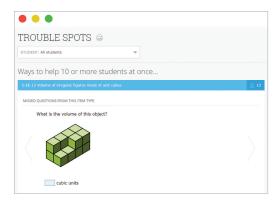

IXL has done the lesson planning for you with TEKS-aligned skill plans. Our curriculum team has mapped out your instructional resources—including popular textbooks, TEKS, TELPAS, TSIA2, STAAR and NWEA MAP Growth—and custom-built IXL skills to precisely match each topic you'll cover.

Be designed to assist the student in achieving satisfactory performance in the applicable grade level and subject area Each of IXL's skills includes between one and fifteen distinct levels of rigor. IXL automatically adjusts the level of difficulty based on each learner's understanding of the skill. Every student in your class can work on the same skill but receive different questions tailored to their specific needs. This guarantees a truly personalized and in-depth learning experience, and that's the kind of learning that sticks.

Be delivered in a 1-on-1 or small group environment, with no more than 4 students in a small group. IXL's flexible platform can be used in a variety of ways. Students can work independently on their personalized skill recommendations or teachers can utilize the built-in tools and analytics to provide individual and small group instruction. The Trouble Spots report even identifies groups of students struggling with the same concepts to help teachers prioritize the biggest problem areas.

"What we love about IXL is the focus on growth. Students have access to this platform that is truly tailored to what they need. And it's not just intervention; for students who are working above grade level, it pushes them to keep growing."
