

IXL for Blended Learning

Districts around the country are choosing IXL as the centerpiece of their blended learning initiatives.

IXL's integrated platform gives districts the tools to drive authentic blended learning in their classrooms:

- Technology that empowers students to own their learning
- High-quality digital resources to support every lesson
- Analytics that help teachers take instructional action in the classroom

EMPOWER STUDENTS TO CONTROL THE PATH AND PACE OF THEIR LEARNING WITH IXL

In IXL blended learning classrooms, every student knows exactly where they are at and what they can do to grow.

The IXL Continuous Diagnostic

IXL's Continuous Diagnostic is the first assessment built to inspire student agency. The Continuous Diagnostic feels nothing like a regular test—it works silently in the background to analyze each student's knowledge. Students can check their diagnostic stats regularly to understand where they are at, and what they can do to improve.

Recommendations Student: Abraham Fernandez

Here are all the math and language arts skills recommended just for you, based on what you've been working on recently. Explore the different types of recommendations, and click on any skill you'd like to try!

Read the text.
When Earth's temperature lowers, the polar ice caps grow. Often, this is called an ice age. To learn about ice ages, scientists study the geology of the land, including chemicals in rocks and fossils. This information helps scientists to figure out when ice ages have taken place. It may be hard to believe, but Earth is currently in an ice age! Due to the huge sheet of ice covering Antarctica, scientists say that Earth is in an ice age known as the Quaternary ice age.

Match causes with their effects.

Cause	Effect
Earth's temperature lowers	Antarctica is covered with ice
Scientists study fossils and rocks	Earth is currently in an ice age

6.1 Subtracting 1 - First grade (94)

What shape is this?

IXL Recommendations Wall

Using insights from all of a student's work on IXL, including analysis from the Continuous Diagnostic, IXL knows the exact skills to help them grow and excel. Instead of locking students into a rigid pathway, IXL offers a Recommendations wall that allows students to make choices about their learning. As students explore their wall and select skills that interest them, teachers can rest assured that every skill on the wall will help them drive growth and mastery. By allowing students to take ownership of their learning, IXL taps into their intrinsic desire to grow and helps them make more progress, faster.

SUPPORT ANY LESSON AND LEARNING NEED WITH IXL'S HIGH-QUALITY CURRICULUM

Whether your district is implementing a station rotation, lab rotation, flex or flipped model, teachers need the right digital resources to support meaningful learning for every student, every day.

IXL has built a comprehensive curriculum of more than 7,000 skills across 5 subjects that complements any lesson from pre-K to 12th grade. Teachers can always turn to IXL to support and extend their daily lessons, no matter the topic. And, IXL's complete state standards and textbook alignments make it even easier to power up any lesson with adaptive, rigorous learning opportunities for students.

TAKE INSTRUCTIONAL ACTION IN THE CLASSROOM WITH INSIGHTS FROM IXL ANALYTICS

With insights from IXL Analytics, teachers can improvise in their blended classrooms and take effective instructional action the moment it's needed.

Support small-group instruction

IXL's Trouble Spots report identifies areas where students are stuck and recommends small groups for instruction. It even provides a carousel of students' missed questions to support targeted reteaching.

Encourage student ownership

The Student Score Chart provides in-depth analysis of an individual student's work on IXL. Teachers can use this report in 1-1 conferences and encourage students to monitor their own progress and identify areas they'd like to work on.

Be everywhere at once

The Real-Time Center is the ultimate tool for managing a blended learning environment. This report allows teachers to monitor class progress live and sends alerts when students need support or are off-task.
