Let’s take a closer look at how IXL supports your daily instruction

**Plan your lesson**

Find the IXL skill that matches your objective

Review your lesson plan and search for 1-2 IXL skills that support your instruction for the day.

You can find these skills by scanning the Grades pages, or by using your IXL skill plan.

**Skill plans:** Check out ready-made IXL skill plans for skills that perfectly match your textbook or standard.

**Grades view:** Get easy access to all skills for your grade level.

---

**STEPS TO SUCCESSFUL IMPLEMENTATION**

IXL is designed to be used daily to reinforce your lessons and help students retain the instruction. Getting started is easy:

1. **Plan your lesson**
   - Find an IXL skill to support your objective

2. **Deliver your lesson**
   - Cement understanding by having students practice the skill to a SmartScore of 80

3. **Check for understanding**
   - Get instant ideas for next steps with IXL Analytics

**IMPLEMENTATION GUIDE**

**IXL for Daily Instruction**

**STEPS TO SUCCESSFUL IMPLEMENTATION**

IXL is designed to be used daily to reinforce your lessons and help students retain the instruction. Getting started is easy:

1. **Plan your lesson**
   - Find an IXL skill to support your objective

2. **Deliver your lesson**
   - Cement understanding by having students practice the skill to a SmartScore of 80

3. **Check for understanding**
   - Get instant ideas for next steps with IXL Analytics
2. Deliver your lesson

Introduce your lesson to the whole class, then release students to work on your selected IXL skills. You can also have students work on these skills for homework, or as one part of a station rotation in class.

Build student confidence
As students work on their assigned IXL skill, they will be building an in-depth understanding of the concept you introduced in your lesson. Questions adapt automatically to each student so that they can develop skill confidence at their own pace.

Set SmartScore goals
For each IXL skill, encourage students to reach a SmartScore of 80 (proficiency). If students achieve proficiency and are ready for a challenge, have them strive for mastery (SmartScore of 100) for extra credit.
3. Check for understanding

Visit the Skill Analysis report to check for assignment completion and to gain insight on your students’ understanding of the lesson. This report gives you overall stats on your class performance and even groups your students by the level of difficulty they are working at within the skill.

Mouse over each student’s name for deeper analysis of their progress. Keep an eye out for students who have a trouble spot and may need additional support or practice with foundational skills.
